

● **Workforce Infrastructure**

# Continuing Education as implementation infrastructure for Rural Health Transformation.

**Cardea views continuing education as an investment in the people and systems that drive Rural Health Transformation.**

Through American Nurses Credentialing Center (ANCC) accreditation and a comprehensive continuing education infrastructure, Cardea delivers learning experiences that strengthen clinical credibility, workforce readiness, and implementation capacity in rural and under-resourced communities.

### Why ANCC Matters

**ANCC accreditation signals clinical rigor, quality, and trust in nursing continuing professional development.**

Cardea uses ANCC intentionally and selectively — when nurses are core to the workforce, when clinical and community systems intersect, and when clinical credibility is essential for adoption, trust, or sustainability.

### Strategic Position

Cardea does not function as a passive CE approver. Continuing education is integrated into broader implementation, quality improvement, and systems-change strategies.

### CE as Implementation Support

Rural Health Transformation depends on a workforce that can apply learning quickly and pragmatically.

#### DESIGNED TO SUPPORT

- Evidence-informed practice aligned with emerging clinical guidance
- Equity-centered and trauma-responsive care delivery
- Measurable changes in knowledge, skills, and practice

### Low-Lift, Multi-Disciplinary Delivery

CE infrastructure designed to reduce administrative burden while supporting multi-disciplinary workforce development.

#### SUPPORTED CE TYPES

**CNE**   **CME**   **CHW**   **AAMA**  
**CPE**   *+ more*

- National delivery via Cardea LMS
- Built-in learner data and evaluation tools
- Streamlined CE administration and approvals

### Flagship Workforce Priorities

Intentionally developing ANCC-enabled learning offerings that address workforce gaps commonly faced by rural systems.

#### PRIORITY AREAS

- Clinical supervision and nurse-community role integration
- Perinatal and maternal health workforce development
- Care-team alignment across clinical and community systems

**Designed for scalability and adaptation to rural contexts.** Rigorous ANCC standards without unnecessary administrative burden.

### Why Organizations Partner With Cardea

Clinical credibility paired with systems thinking. CE that supports implementation beyond compliance. Workforce learning grounded in equity, practicality, and real-world constraints.
