

● **Capability Overview**

Maternal Health Systems: Supporting Workforce, Learning, and Implementation to Improve Care Delivery

Cardea supports maternal and child health initiatives through community-centered and clinically responsive evaluation, workforce development, implementation support, and systems-level collaboration.

Why Maternal Health Systems Matter

Improving maternal and child health outcomes requires coordinated systems that center families and connect providers, public health agencies, and communities across silos. Sustainable change depends on strong measurable outcomes, workforce readiness, and clear implementation strategies.

Core Capability Areas

Maternal Child & Early Childhood Evaluation

Designing practical evaluation frameworks that support learning, improvement, and accountability.

Birth Equity Initiatives

Supporting programs focused on reducing disparities and improving equitable access to culturally responsive, person-centered care.

Perinatal Systems Strategy

Strengthening systems that connect clinical care, public health, and community supports from pre-conception through early childhood and beyond.

Multi-Sector Collaboration

Facilitating partnerships across agencies, providers, funders, and community organizations.

Community-Centered Implementation

Supporting implementation approaches grounded in local context and community priorities.

Proof Points

Multi-state

Maternal and child health initiatives across California, Maryland, Missouri, Ohio, Oregon, Texas, Washington, Indian Country, and beyond.

Experience

Experience supporting statewide, regional, and national transformation efforts.

Expertise

Expertise bridging evaluation, workforce development, and implementation.

Why Organizations Partner With Cardea

Cardea helps organizations move beyond planning and into action through evaluation, workforce support, implementation development, and systems-level collaboration that improves maternal and child health outcomes.
